## **UCS1611- Internet Programming Lab**

**Assignment: Exercise 4**

**6<sup>th</sup> Semester B sec**

**Faculty in-charge: K.Vallidevi**

**Due: 21<sup>st</sup> Mar,2021**

---

Three-tier application with Servlet and Database connectivity  
(Online Examination with DB Connection)

### **Specifications:**

Create a three tier application where the students are allowed to login only after authentication with their credentials stored in DB.

Questions are to be popped up from the DB with the respective choices.

Answers that are submitted are to be checked with the correct answers stored in the DB.

Finally the marks obtained by the student are to be displayed.

Explain the design of the project with the full communication happening across Model View and Controller. Submit this through the assignment that will be enabled in LMS.
